

PRINCE CALVIN P

Business Analyst

Agile Scrum | Requirement Engineering | SDLC | Stakeholder Management | Enterprise Applications

Chennai | +91 8220704853 | www.linkedin.com/in/prince-calvin-p | princecalvin86984@gmail.com

PROFFESIONAL SUMMARY:

Business Analyst with **2.7 years of experience** delivering enterprise software solutions across Retail, Healthcare, and Internal Engineering domains. Experienced in partnering with Product Owners, business stakeholders, and Agile teams to translate business needs into scalable digital solutions through requirement elicitation, business process analysis, functional documentation, and product delivery.

WORK EXPERIENCE:

Business Analyst

Avasoft Pvt. Ltd, Chennai, TN

December 2023- Present

- Served as the **primary Business Analyst**, partnering with Product Owners and business stakeholders to deliver enterprise applications uncovering business needs, and facilitated **20+ requirement gathering workshops** and Identified opportunities for **business process optimization** by analyzing workflows, reducing manual effort, and improving operational efficiency.
- By conducting Stakeholder Interviews, translated complex business requirements into **20+ Functional Requirement Documents (FRDs)**, used **Confluence** as Project Artifact, **Functional Specifications** and **200+ development-ready User Stories**, following the **INVEST** principle to improve requirement clarity, estimation accuracy, and sprint readiness.
- Defined comprehensive **Use Cases, Acceptance Criteria**, business rules, assumptions, constraints, and success criteria to minimize requirement gaps during development and **UAT**.
- Produced **As-Is** and **To-Be** process models, **BPMN** process flows, **swimlane diagrams**, and **workflow documentation** that enabled business stakeholders and engineering teams to align future-state business processes and identify process gaps.
- Maintained requirement traceability through **Requirement Traceability Matrix (RTM)** project documentation, and change documentation throughout the SDLC.
- Collaborated within a **15+ member Scrum team**, actively contributing to Sprint Planning, Backlog Refinement, Story Estimation, Sprint Reviews, Sprint Retrospectives, and Release Planning across multiple Agile delivery cycles.
- Prioritized product backlog items using **MoSCoW** prioritization, balancing business value, erformed requirement impact and risk assessments for **15+ change requests** to minimize delivery risks and ensure alignment with business objectives.
- Supported **30+ production deployments**, validating business functionality, coordinating release readiness activities, and ensuring smooth production rollouts with minimal business disruption.
- Collaborated directly with **15+ international Product Owners** and business users through **requirement workshops**, solution walkthroughs, UAT sessions, sprint reviews, and weekly governance meetings.
- Coordinated **20+ User Acceptance Testing (UAT)** cycles by preparing business validation scenarios, supporting stakeholder testing, triaging functional issues, and obtaining business approvals before production releases.
- Validated business functionality using **SQL data analysis, REST APIs, Postman, and JSON**, ensuring business rules, data integrity, and system integrations met functional expectations.

- Collaborated with **cross-functional teams** including **UI/UX** teams by designing and reviewing **wireframes** using **Figma, Microsoft Visio, and Draw.io**, reducing rework by validating business workflows before development.
- Partnered closely with **Development and QA teams** throughout the SDLC to clarify functional requirements, resolve requirement gaps, and validate business functionality.

PROJECTS:

RAC Mexico – Enterprise Retail Rental Platform:

- RAC Mexico was a regional expansion initiative to localize the existing Rent-A-Center platform from the US for the Mexican market by **adapting business workflows**, customer journeys, and operational processes. Led business analysis activities throughout the **SDLC** collaborating with **Product Owners** and **cross-functional teams** to define business requirements, support solution design, and ensure successful delivery through stakeholder validation and **production rollout**.

Engineering Performance Dashboard:

- An **internal analytics platform** developed to provide engineering leadership with real-time insights into team performance, resource utilization, delivery metrics, and **AI adoption** using data consolidated from **Jira**. Gathered business requirements, defined functional specifications, documented **KPIs** and **Engineering rubrics** logic, and validated dashboard functionality before production deployment.

SKILLS:

- | | |
|--|---|
| • Business Process Analysis | • Sprint Planning/ Review/ Retrospective |
| • Business Process Optimization | • SQL Data Analysis |
| • FRD/ Confluence/ User Stories/ Acceptance criteria | • REST API/ Postman |
| • Cross-functional Collaboration | • ChatGPT/ Claude/ Copilot/ Gemini |
| • Stakeholder/ Risk/ Change Management | • Figma/ Visio/ Draw.io/ Excel |
| • Wireframes/ Process Flow Diagrams | • Gen AI/ LLM/ RAG/ Agentic AI validation |

EDUCATION:

- Bachelor of Engineering in Civil in Excel Engineering College, Namakkal, Tamil Nadu.
